Summary

Final-year Computer Science student with experience designing and developing full-stack web applications using modern JavaScript technologies. Strong foundation in software engineering principles, RESTful systems, and problem-solving, with a passion for building reliable, scalable products that improve user experiences. Eager to contribute to fast-paced engineering teams solving meaningful technical challenges.

Education

B.Tech in CSE, N.B.K.R Institute of Science & Technology
CGPA: **8.29**

Sep 2022 – Jun 2026
Andhra Pradesh

Skills

- **Languages:** Java, JavaScript
- **Core CS:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), DBMS
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js, REST APIs
- **Database:** MySQL, MongoDB
- **Tools:** Git, GitHub, Render, Postman
- **Certifications:** Azure AI Fundamentals (Microsoft), AI Fundamentals (IBM SkillsBuild)

Experience

Infosys Springboard

Feb 2026 – Apr 2026

Full-Stack Development Intern

- Designed and developed a full-stack Campus Event Hub platform supporting 3 distinct user roles (students, administrators and college admins) with role-based access control.
- Led version control management for a 5 member team using Git and GitHub, facilitating code integration and collaborative feature development.
- Built secure REST APIs, implemented authentication, and managed database operations for core application functionality.

Projects

Campus Event Hub – Full-Stack Event Management Platform | [GitHub](#)

- Developed a full-stack event management platform with role-based access control, featuring event creation, registrations, approvals, attendance tracking, personalized dashboards, and real-time notifications.
- Built secure REST APIs with JWT authentication and integrated MongoDB for efficient data management.
- **Tech Stack:** React, Node.js, Express, MongoDB

Medigo – Doctor Appointment Booking Website | [GitHub](#)

- Created a full-stack doctor appointment booking application for scheduling and managing appointments.
- Integrated REST APIs with frontend to ensure smooth data handling and user interaction.
- **Tech Stack:** React, Node.js, Express, MongoDB

Fashion Store – Full-Stack E-Commerce Website | [GitHub](#)

- Built a full-stack e-commerce platform with product listing, wishlist, cart, and checkout features.
- Implemented authentication, admin dashboard, and CRUD operations for product and order management.
- **Tech Stack:** React, Node.js, Express, MongoDB

Extra-Curricular Activities

- **Design Team Lead – IEEE SB NBKRIST:** Led the design team, creating posters and digital assets that improved event participation and engagement.
- **Hack Arena 2024 (National-Level Hackathon):** Built EcoSmart, a smart waste management system within a 48-hour hackathon.
